

Protect what you value.

McAfee Total Protection Service

An integrated business solution that reduces infrastructure costs and automates security maintenance

New threats emerge every day. Spam, phishing, viruses, and hackers can steal your valuable data and disrupt your network. Without constant updates, your anti-virus and security software becomes obsolete. Keeping your business continuously up to date requires total protection against all types of known and unknown threats.

KEY ADVANTAGES

Security in one solution

- Total Protection Service solutions are single, integrated software services for the desktop, file server, and email that are easy to install and easy to maintain

Easy and affordable

- Get virus, spyware, spam, web security, phishing, and desktop firewall protection; web-based management and reporting; automatic updates and upgrades; and around-the-clock technical support for an annual low-cost subscription fee
- Reduce the need for additional security management software, hardware, technical support, or dedicated IT staff, as McAfee hosts the automated reporting and updating infrastructure offsite

McAfee SecurityCenter simplifies management

- This easy-to-use, web-based console manages and reports on your security services
- SecurityCenter centralizes all installations, configurations, reports, and updates, and creates multiple user groups

Total protection means a comprehensive security solution that is always on, always ready, and always up to date—not just in the office, but also when remote. McAfee offers businesses the industry’s first truly integrated security solutions, managed by a single console, and at affordable prices. Available in two versions, McAfee® Total Protection (ToPS) Service (formerly McAfee® Total Protection™ for Small Business) solutions protect against viruses, spyware, spam, phishing, hackers, and identity thieves.

	Total Protection Service	Total Protection Service —Advanced
McAfee SecurityCenter, single management console	✓	✓
Desktop and file server anti-virus and anti-spyware	✓	✓
Desktop firewall	✓	✓
Web security	✓	✓
Email anti-spam and anti-virus service*		✓
Email server anti-virus and anti-spam		✓

*McAfee Secure Messaging Service™ Small Business Edition

Automatic Updates for Desktop and Server Protection

With the system connected to the Internet or an Internet relay, ToPS Service automatically protects and updates all systems at regular intervals throughout the day, as well as upgrades to the latest version—all without interruption to the end user. These fast updates keep your desktops, servers, and email proactively protected against ever-evolving security threats.

Integrated Web Security

McAfee SiteAdvisor™ complements and enhances ToPS Service by warning users before they visit a dangerous web site and helps to avoid online threats in real time. McAfee SiteAdvisor helps users stay safe online by testing web sites and delivering safety ratings right to users while they browse.

SYSTEM REQUIREMENTS

The McAfee Total Protection Service solutions are designed for Microsoft Windows® operating systems running on a PC platform.

Note: The following are general system requirements and may vary depending on the nature of your environment.

- CPU: Intel Pentium processor or compatible architecture
- RAM: 64 MB minimum RAM (128 MB recommended; 256 MB recommended for servers)
- Internet connection: Microsoft Internet Explorer 5.5 with SP2 or later

Workstations:

- Windows 2000 Professional with SP2 or later
- XP Home or Professional
- Windows Vista 32-bit and 64-bit

Servers:

- Windows 2000 with SP2 or later
- Windows 2000 Advanced Server with SP2 or later
- Windows 2000 Small Business Server with SP2 or later
- Windows 2003 Standard Server
- Windows 2003 Enterprise Server
- Windows 2003 Web Edition
- Windows 2003 Small Business Server
- Total Protection Service—Advanced requires that you own a unique email domain name and an email server with a static IP address

Advanced, Real-Time Email Security

In our advanced offering, ToPS Service processes email in real time through a highly secure system. Filter and quarantine inbound threats from your email before they reach your network. Compatible with all major email applications, such as Microsoft Exchange, McAfee Secure Messaging Service Small Business Edition processes your mail with less than a one-second delay. McAfee also offers email server virus and spam protection for users who would like to monitor email security in-house—easy to install, quick to protect.

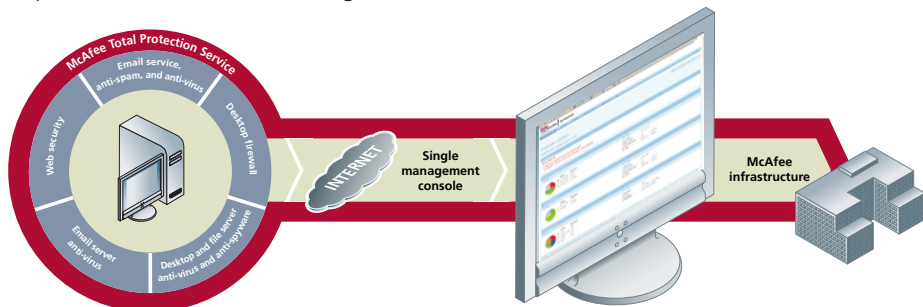

Lowered Total Cost of Ownership

ToPS Service is ideal for organizations in need of automated security and maintenance, without investing in additional onsite infrastructure or software. It lessens the burden to IT staff while maximizing the protection at the desktop, file server, and email levels. McAfee's Gold Technical Support is included in the subscription for easy access to trusted security experts by phone, chat, and email.

Benefits

Both McAfee solutions make it easy to simplify your security with proven technology:

- **Single management console**—The easy-to-use, web-based McAfee SecurityCenter for remote monitoring and reporting
- **Integrated desktop and file server anti-virus and anti-spyware**—Automatically secure your systems from known threats and potentially unwanted programs, and also provide basic email protection for Outlook applications
- **Centralized desktop firewall**—Provide an immediate barrier between your critical data and malicious intrusions
- **Real-time web security**—McAfee SiteAdvisor keeps users safer surfing while accessing the Internet
- **Advanced email anti-spam and anti-virus service**—Provide always up-to-date inbound email protection that improves availability and assures business continuity via our Secure Messaging Service, Small Business Edition
- **Advanced email server protection**—Guard over your mail servers with virus and spam protection and content filtering
